Gwendolyn Keyes Fleming
Regional Administrator
USEPA, Region 4
Sam Nunn Federal Center
61 Forsyth Street, SW
Atlanta, Georgia 30303-8960

Dear Ms. Fleming:

I am pleased to submit the North Carolina certification demonstrating that the North Carolina Department of Environment and Natural Resources, Division of Air Quality (NCDAQ) has met the requirements of the Clean Air Act (CAA) Section 110(a)(1) and (2) infrastructure State Implementation Plan (SIP) requirements for the 2008 lead National Ambient Air Quality Standards. The NCDAQ relied on the United States Environmental Protection Agency's (USEPA's) October 14, 2011 memorandum, "Guidance on Infrastructure State Implementation Plan (SIP) Elements Required Under Section 110(a)(1) and (2) for the 2008 Lead (Pb) National Ambient Air Quality Standards (NAAQS)" to develop this SIP.

Please find attached the "North Carolina Certification for Clean Air Act Section 110(a)(1) and (2) 2008 Lead Requirements" Infrastructure SIP. Included with the certification document is a copy of the North Carolina General Statutes referenced in the Infrastructure SIP and copies of the USEPA memorandums and notices used to develop the Infrastructure SIP. An exact duplicate electronic copy is provided on compact disk.

The North Carolina General Statutes are provided as referenced material only. It is not the intent of the NCDAQ to have these statutes adopted into the SIP. The NCDAQ believes that the State's statutes are not required to be adopted into the SIP based upon the USEPA Federal Register (FR) notice on May 19, 2010 regarding California's legal authority (75 FR 27938). In this final rule the USEPA states, "We also noted that the actual statutory provisions and other legal documents relied upon to support a State's assurance of adequate legal authority need not be approved into the SIP under CAA section 110 or [USEPA's] SIP regulations in 40 [Code of Federal Regulation] part 51 (although such provisions are required to be submitted with the plan). Thus, [USEPA] could approve, consistent with CAA and [USEPA] requirements, and did so in this instance, a wholesale revision to the original legal authority chapter without also approving the actual statutory provisions and other legal documents cited there."

The NCDAQ issued a public notice announcement on May 10, 2012, indicating that the Infrastructure SIP certification documentation was available for public comment until June 15, 2012 and posted the SIP on the NCDAQ's website for public review. The public notice

announcement was sent to a number of distribution lists managed by the NCDAQ. These distribution lists included numerous stakeholders from industry, environmental groups, and transportation partners. The NCDAQ believes that sending the public notice announcement to these groups is more effective than publishing the notices in a few local newspapers and is consistent with the requirements described in the April 6, 2011, memorandum, "Regional Consistency for the Administrative Requirements of State Implementation Plan Submittals and the Use of Letter Notices." Additionally, the NCDAQ website has Rich Site Summary (RSS) feed which regularly delivers changes to the website content to those that have signed up for it.

The public notice announcement also indicated that the public may request a public hearing. There were no requests for a public hearing and no comments received during the comment period.

The NCDAQ believes it has in good faith addressed the requirements of Section 110(a)(1) and (2) through the various SIP submittals. If you should have any questions regarding this submittal, please contact Laura Boothe of my staff at (919) 707-8721.

Sincerely,

Sheila C. Holman
